

Available exclusively through skin care professionals, the new CLARISONIC™ MD Professional Skin Care Brush maintains all the features of its successful predecessor, the CLARISONIC™ Skin Care Brush, but with an additional third, higher power setting that's especially effective on the body (shoulders, décolleté, back of arms, scalp), yet gentle enough for use on the face.

Like the original CLARISONIC Skin Care Brush, CLARISONIC MD uses sonic oscillation to deeply cleanse, stimulate and clarify the skin by working with its natural elasticity to unclog pores for deeper cleansing without stripping the skin. Safe for virtually all skin types and for daily use, CLARISONIC MD is clinically shown to be over twice as effective as manual cleansing. The outer (stationary) brush and the inner (oscillating) brush work synergistically with the skin to create a deep cleansing zone. The inner brush oscillates back and forth at a sonic frequency of more than 300 movements per second. This zone between the two brushes gently flexes the pores to loosen dirt and oil.

Product Features

- **Three power levels:** low, normal and high (gentle on the face, and especially effective on the body)
- **Three T-Timer™ settings:** for thorough and even cleansing
- **One-touch programming**
- **Two brush heads:** for normal and sensitive skin
- **Charging cradle:** for long-lasting charge
- **Waterproof handle:** for use in the shower

Product Benefits

- Clinically proven to be over twice as effective as manual cleansing
- Increases product absorption
- Prepares the skin well for in-office procedures
- Gentle enough for everyday use at home
- Reduces blemishes, oily areas and dry patches
- Reduces appearance of pore size, fine lines and wrinkles
- May be beneficial in a treatment regimen with common skin conditions such as acne and seborrhea.

CLARISONIC Applications

- Ideal for daily skin cleansing at home; feels like a micro-massage every day
- Ideal for in-office use as preparation for office-based treatments, such as microdermabrasion, AHA peels, IPL treatments, laser hair removal, laser resurfacing
- Ideal as part of in-spa facials and other cosmetic treatments
